

NEW CONCEPT : SIMPLY THE BEST : LONG SERVICE LIFE MAINTENANCE FREE

NG products, Flange and Pillow Block Bearings, are designed for the Food Industry and for other industries where an immensely strong housing and easy clean design are needed. Smooth surfaces and rounded corners ensure that the risk of bacteria growth is reduced.

The protection is **IP66/IP67** which ensures that the units can be cleaned from every direction with pressure water systems. An oil seal ring with stainless steel spring ensures that water cannot penetrate the housing, note the open and closed covers are bolted firmly to the main body of the housing and not just clipped on. The Bearings are maintenance free and resistant to all cleaning products and also most chemicals.

Please enquire for much more comprehensive details or to arrange a visit from the sole Swiss Distributor.
